

## **MULTI-FUNCTION CLAMP**

### **ABSTRACT OF THE DISCLOSURE**

A multi-function clamp has a base plate, a connecting seat connected to the base plate, a pressing seat integrally formed with the connecting seat, an outer cover pivotally connected to the base plate and a rear clip securely engaged with the base plate. Multiple soft pads are securely sandwiched between the base plate and the outer cover to function as shock absorber. Spacers are formed on a rear face of the base plate to keep a distance to the rear clip. Hemispheres are formed on the rear clip to engage with the rear face of the base plate to clamp an object with the rear face of the base plate.
